V - T E C H S E R U M

Synthetic exosomes with High molecular weight polynucleotides 2% (20mg/ml)

- Biomimetic peptides(20mg)
 - Oligopeptide 20
 - Acetyl decapeptide3

Plant stem cells

Application protocol with microneedling

Phase 1 : Spread 2ml of V-Tech Serum on the area to be treated then pass the microneedling device in antigravitational direction

Normally 2 ml of V-Tech Serum are sufficient for each area (face-neck-décolleté)

Speed and needle depth should be regulated depending on skin structure

Application protocol with microneedling

Protocol:

- 1 session every 2 weeks
- For at least 4-6 sessions
- Repeat 2 cycles per year

Application protocol

One session every 14 days for 4 consecutive sessions.

We suggest one maintenance session every 2 months to optimize results

Thank you
